

# DWV Debris Guard Installation Manual

The **DWV Debris Guard** is a vent pipe solution designed to be compatible with any standard 2" or 1 1/2" plumbing pipe on residential composition roofs.

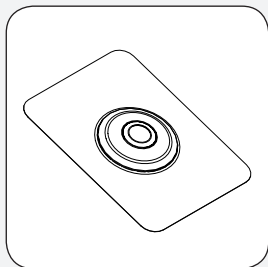

The DWV Debris Guard will allow installers to span PV modules over standard drain waste vents while maintaining the integrity of the household plumbing system.

In standard solar installations, the DWV Debris Guard is installed after the ZS Comp Flashings and Comp Mounts, and before the PV modules.

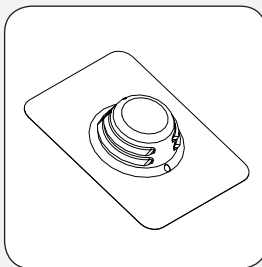

Follow standard SolarCity procedures with necessary safety equipment during any and all roofwork.

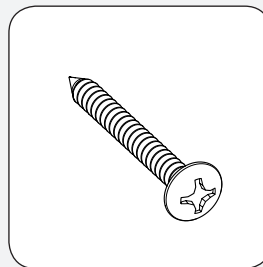

## Components

**Zep Flashing**  
Part No. 850-1520-001

**Debris Guard**  
Part No. 850-1521-001

**Truss Head Screw**  
#8 1-1/2" length
